

LARGE FINANCIAL INSTITUTION TEAMS UP WITH INNOVISE ESM TRAINING To assist in developing a MPLS training programme

The Brief

A large financial institution selected Innovise ESM Training to assist with the development of an MPLS training programme in line with their specific requirements.

The Approach

The first phase of the project required a detailed Training Needs Analysis (TNA) to help identify the precise areas where training was needed. This involved the placement of a training consultant whom would work directly to define the exact training content required and the materials to be used to deliver it.

The Solution

A bespoke training solution that enabled the customer to better utilise both their training budgets and staff resources.

The material and associated labs were developed to reflect the specific areas of the topics identified in the specification, hence maximising the value of the training received.

As a result of the TNA a detailed course syllabus was created:

- Module 1: MPLS Concepts
- Module 2: MPLS VPN Technology
- Module 3: MPLS VPN Implementation
- Module 4: Complex MPLS VPNs

The Benefits

The following benefits were gained:

- Customised to specific requirements
- Maximised value from training budgets
- Reduced time away from the work place
- Increased staff efficiency

In Brief

Industry

- Banking & Finance

Challenge

- To design and develop technical training course for networking team
- Define content areas and the materials to be used

Approach

- To develop a bespoke solution aligned with the organisations goals and requirements

Solution

- A detailed syllabus was created to include the topics MPLS Concepts, MPLS VPN Technology & Complex MPLS VPNs

Benefits

- Customised to specific organisational requirements
- Maximised value from training budgets
- Reduced the time needed away from the work place
- Increased staff efficiency
